EDUCATION

Guru Nanak Dev University, Amritsar

Bachelors Of Technology in Electronics & Computer Engineering | 2023-27

CGPA: 7.27

CBSE Class 12 | 2022

84.4%

CBSE Class 10 | 2020

92%

SKILLS

- **Languages:** Java, Python, SQL (MySQL)
- **Frameworks & Technologies:** Java Swing, JDBC
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS
- **Java Concepts:** Exception Handling, File Handling, Collections Framework
- **AI & Automation:** Prompt Engineering, LLM Integration, Pydantic, Resume Parsing
- **Tools:** Git, GitHub, IntelliJ IDEA, VS Code, NetBeans

PROJECTS

Car Rental Desktop Application | Java, Swing, SQL, JDBC | [GitHub Link](#)

- Developed a Java Swing desktop application with **20+ interactive GUI screens**, delivering an end-to-end workflow from customer registration to vehicle return.
- Designed a **MySQL relational database** with 4 core tables ensuring data integrity across application records.
- Implemented **JDBC-based CRUD operations** for fleet management, enabling real-time vehicle availability updates.
- Built **secure user authentication and role-based access control (RBAC)** using PreparedStatements to prevent SQL injection.

Point of Sale (POS) & Inventory Management System | Java, Swing, SQL, JDBC | [GitHub Link](#)

- Developed a Java Swing **Point of Sale (POS)** desktop application using Object-Oriented Programming (OOP) for product catalog and cart management.
- Designed a **MySQL relational database** and integrated JDBC to process checkout transactions using master-detail billing relationships.
- Implemented **Java File I/O (FileInputStream/FileOutputStream)** to read, store, and manage product images.
- Developed dynamic checkout logic to validate inventory and update stock levels in real time during transactions.

AI Resume Screening System | Python, Groq API, LLMs, Pydantic | [GitHub Link](#)

- Built an **LLM-powered Applicant Tracking System (ATS)** that analyzes job descriptions and ranks resumes based on skill and experience matching.
- Designed **Pydantic-based JSON schemas** to extract and validate structured information from resumes and job descriptions.
- Implemented **PDF and DOCX resume parsing** using PyPDF and python-docx to support multiple resume formats.
- Engineered system and user prompts using the **Groq API** for reliable information extraction and candidate evaluation.
- Automated resume scoring, ranking, and candidate comparison with match percentages and recruiter-friendly feedback.

INTERNSHIPS

Java Standard Edition Intern | VMM Education

Jun – Aug 2025

- Completed 6-week industrial training in Java, OOP, debugging, and desktop application development.

ACHIEVEMENTS

- Solved **130+** problems on **Leetcode & GFG**.
- Captain of the GNDU Inter-Department Chess team, securing 2nd place (2023–24).
